

FCC,

I am concerned to hear that you are considering removal of local content from my satellite radio system. Bad move. The services offered by my satellite provider are welcomed by me, my family, and my work associates. It is good to know that at any time, day or night, I can find out information about the local road traffic and local weather in most major metropolitan cities. I respectfully request that you please reject the NAB's petition 04-160.

Regards,

Concerned Saltellite Radio Listeners (and Registered Voters)

P.S. - I fully support the reduced presence of Howard Stern from the airwaves.
